

Red clover — A plant that grows throughout the United States, Europe, and northern Asia, the blossoms of red clover contain phytoestrogens similar to those found in soy. The isoflavones formononetin, biochanin A, daidzein, and genistein are present and have been found to exert estrogen-like activity.

Licorice — Along with dong quai, licorice root has a long history of use dating back thousands of years in Asian culture. It, too, has been found to be a source of phytoestrogens.

Menopause Balance Complex*

- A unique blend of well-researched ingredients known to provide nutritional support for hormonal balance during the transitional period of menopause, only Menopause Balance Complex contains a unique combination of black cohosh, soy isoflavones, flaxseed, and a proprietary phytoestrogen blend of dong quai, red clover, and licorice.*
- No artificial colors or flavors.
- No synthetic preservatives.
